

Take the right courses.

While all students entering the ninth grade at a Texas public high school are automatically enrolled in the Recommended High School Program, some students may choose to follow the Distinguished Achievement Program. Talk to your counselor or adviser to make sure you are taking the right courses for your desired college plan.

Challenge yourself.

Colleges look at the rigor of your courses in addition to your grades, so sign up for tough classes. More rigorous courses will also better prepare you for the SAT/ACT and college coursework.

Get off to a strong start.

All your freshman courses and grades will be on your transcript that you send to colleges, so do your best to get off to a good start academically.

Explore career options.

Continue thinking about your interests and what career fields might match up with them. What kind of postsecondary education is required? Will you need two years, four years, or college plus a graduate degree?

Research colleges.

Start looking for information about colleges that fit with your career interests. Talk with your mentor and check out college websites and catalogs in your school's college or career center. Your options for college include two-year schools, technical schools, certificate programs, and universities. Make the choice that's right for you.

Get involved.

Participate in activities you care about, whether it's sports, clubs, community service, church, etc. Colleges look for well-rounded students, so it is important to show you are involved in activities outside of the classroom.
