

Primary Care Services

Your health is our priority

We are your first stop for healthcare. Given the right tools, information, access, and support, you can maintain and improve your health. We treat common, short-term illnesses such as infection, rashes, and stomach problems. Our screenings, exams, and blood draws are all right here, at your health center.

We take the time to get to know you.

Longer appointments help you and your provider understand your health concerns. Your appointment includes personalized health coaching to help you set goals that are important to you. Additionally, we coordinate your care with your primary care and specialty providers.

We offer a wide range of primary care services, including:

- Treatment for when you're sick
- Annual preventive exams, vaccines, labs and screenings
- Support for diabetes, high blood pressure, high cholesterol, asthma, and more
- Tobacco cessation, weight management, and stress reduction
- Prescription management
- Referral coordination

“The nurse was so genuinely concerned about my illness; so much so, that she called me to ensure that I made it home safely.”

- Patient at a Marathon Health center
